

Port-security

Exempelkonfiguration

```
switchport port-security violation restrict
switchport port-security mac-address sticky
switchport port-security mac-address sticky aaaa.bbbb.cccc
switchport port-security aging time 6
switchport port-security aging type inactivity
switchport port-security
```

Sticky MAC

Används sticky-mac får MAC-adressen enbart finnas på en port på switchen. Skulle den dyka upp på en annan port kommer den inte kunna kommunicera. Följande loggrad syns:

```
Oct 1 08:58:12: %PORT_SECURITY-2-PSECURE_VIOLATION_MAC_MOVE: Security violation occurred, caused by MAC
address aaaa.bbbb.cccc on port GigabitEthernet1/0/46 attempting to access port GigabitEthernet1/0/13 .
```
