

Fullt i cache, webdav, nfs

Om cachen är full kan man få följande loggar:

```
Aug 08 19:36:12 turnkey-fileserver mount.davfs[751]: open files exceed max cache size by 20523 MiBytes
Aug 08 19:36:12 turnkey-fileserver mount.davfs[751]: error writing directory /var/cache/davfs2/u412571-
sub1.your-storagebox.de+mnt-webdav+root/dir--qg4ZAa
Aug 08 19:36:13 turnkey-fileserver mount.davfs[751]: error writing directory /var/cache/davfs2/u412571-
sub1.your-storagebox.de+mnt-webdav+root/dir--LHFQmk
Aug 08 19:36:15 turnkey-fileserver mount.davfs[751]: error writing directory /var/cache/davfs2/u412571-
sub1.your-storagebox.de+mnt-webdav+root/dir--fyGe4b
```

Stoppa först nfs med `systemctl stop nfs-server`. Umounta disken med `umount -lf /mnt/webdav`. Rensa cache med `rm -rf /var/cache/davfs2/*`. Mounta och starta, `mount /mnt/webdav` följt av `systemctl start nfs-server`.
